

WHO WE ARE:

Delaware County Transportation Management Association (DCTMA)— Accredited by PennDOT, Serving Delaware County Since 1993

For more than 30 years, DCTMA has been a vital resource for transportation planning, safety, and outreach in Delaware County. As a regionally connected TMA with PennDOT ECMS accreditation and deep ECMS know-how, we stand ready to support your firm's success on upcoming projects.

KEY ADVANTAGES:

As a PennDOT-accredited, ECMS-certified organization, DCTMA offers engineering firms a unique opportunity to work with a trusted local partner in Delaware County. With over 30 years of experience supporting transportation initiatives, we bring unmatched regional expertise, credibility, and readiness to serve.

- **ECMS-Certified:** DCTMA is accredited by PennDOT and eligible to participate in PennDOT projects.
- **Subcontracting Capability:** Available to serve as a subcontractor to engineering firms and project managers on PennDOT projects.
- **Local Expertise:** Serving all of Delaware County within PennDOT District 6 (Bucks, Chester, Delaware, Montgomery, Philadelphia).

HOW DCTMA ADDS VALUE TO PROJECTS:

Beyond compliance, DCTMA delivers tangible value to PennDOT projects by connecting engineering firms with the communities they serve. Our outreach, safety, and commuter programs help projects run smoother, reduce disruptions, and build trust with local stakeholders.

- Organize focus groups or meetings
- Notify businesses, municipal leaders and elected officials of up-coming projects
- Keep the public updated with current information during the various stages of your construction project impacting employees and residents
- Traffic counts
- Assist in planning alternative transportation options for commuters and residents during project construction, including shuttles
- Distribute information on transportation alternatives for employees and residents affected by the project work
- Increase the visibility of PennDOT and the engineering firm working as the project lead to local municipalities, businesses, and constituents by distributing planning information
- Provide access to a broad labor pool
- Analyze the location and commuting options of local employees
- Broker transportation solutions
- Provide support for commuting employees in the area

DCTMA (ECMS - accredited, regionally connected)

ECMS DELIVERY PARTNER:

The Pennsylvania Department of Transportation's Engineering & Construction Management System (ECMS) is the backbone for delivering state transportation projects. From contracts to consultant agreements, ECMS ensures transparency, efficiency, and accountability in how projects are planned, awarded, and managed.

MAKING ECMS EASY:

If your municipality or private owner partner lacks in-house ECMS expertise, pairing your engineer with DCTMA, streamlines registration, submittals, and PennDOT coordination—shortening ramp-up, lowering admin risk, and freeing the engineer to focus on deliverables.

DCTMA KEEPS PROJECTS ALIGNED:

As a TMA connected to PennDOT/DVRPC/SEPTA committees, DCTMA can help keep project scopes and milestones synced with TIP/STIP programming and PennDOT Connects expectations.

The DCTMA, a 501(c)3 non-profit TMA, accredited by PennDOT, serving Delaware County Since 1993. With ECMS accreditation, we are eligible to be a sub-contractor to project managers and engineering firms on PennDOT projects. DCTMA partners with PennDOT, SEPTA, and DVRPC for advance transportation projects and programs in Delaware County.
